
Personal Identifiers

ORCID

- Free and unique persistent identifier; it distinguishes you from other researchers, linking to a profile you control and populate with information defining who you are, as well as your research, publications, affiliations, awards, and grants
- It allows linking to other scientific identifiers, namely ResearcherID and Scopus ID
- After creating an ORCID ID, authors should enter their identifier in the designated [IS Věda interface](#)
- Academic staff are obliged to indicate their affiliation to FHS UK in the following wording when creating an identifier: Charles University, Faculty of Humanities
- [Registration](#) is free; please [download](#) the instructions for more details

ResearcherID

- A unique identifier that differentiates researchers in the Web of Science
- It helps ensure proper attribution of research and tracks citation metrics
- It is created automatically and can be [linked](#) to the ORCID

Scopus ID

- A unique identifier assigned by the Scopus database to an author
- Allows you to track your publications and citation metrics, link to co-authors and collaborators
- It is created automatically and can be [linked](#) to the ORCID
